

What's New

Delphix August 2023 Product Updates

Product Offerings

Data Control Tower

Single Point of Control for Multicloud Data Governance, Compliance, and Automation at Scale

Data Governance

Data library with catalog, tagging, and attribute-based access controls

Data Compliance

Global sensitive data visibility and central masking orchestration

Data Automation

Self-service developer experience with pre-built DevOps integrations to automate test data within CI/CD pipelines

 Terraform  servicenow  Jenkins  Jira

 GitHub  urban{code}  GitLab

August Feature Highlights

- **Continuous Data** now supports using on-premises object storage arrays, enabling dramatically lower-cost operations.
- **Continuous Data** now has replication failback to test and recover from failover scenarios.
- **Continuous Compliance** now has new classifiers to detect additional sensitive data, including full name, IP address, and age.

Hyperscale Compliance

- Delimited Files Connector: You can now use Hyperscale Compliance to mask collections of delimited files of your choice.

Compliance Services for Salesforce

- Data Type Prefiltering: build a correct ruleset based on the datatype and identify non-maskable fields.
- Large Table Optimization (Beta): Additional optimizations to better support the masking of large tables are now available

Compliance Services for Azure

- Support for Azure Private Link: You can now access DCS for Azure over a private endpoint in your virtual network, avoiding exposure to the public internet.
- (Beta) Automatic Sensitive Data Discovery as a Service: This beta offering will allow you to profile and mask data in a single Azure Data Factory pipeline or split these into two separate pipelines depending on the desired review workflow. If interested, please contact microsoft@delphix.com.

Updated Connectors

Connector	Version
PostgreSQL	v4.1.1
MySQL/Linux	v4.1.0
SAP HANA	v6.3.2
Hyperscale Delimited Files	v1.0.0
