

What's New

New Features in December 2022 & January 2023
Continuous Data & Compliance 7.0, DCT 3.0/4.0, and more

Product Offerings

Continuous Data

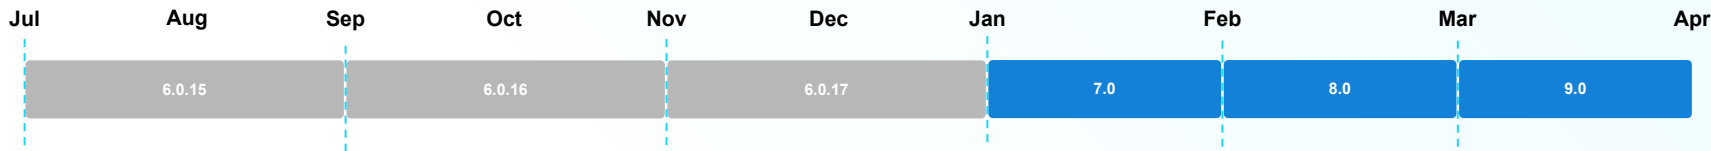

New & Updated for January 2023

- Oracle: Multi-Tenant TDE for VCDBs
- Oracle: Staging Push
- Cassandra: Continuous Data Connector

Release Changes

We have made changes to **Continuous Data** (Virtualization) and **Continuous Compliance** (Masking) releases for 2023 to bring you new functionality at an accelerated pace. There is no change to the existing support window, releases are supported for 18 months from general availability, followed by extended support for an additional 18 months. Deprecation and product end-of-life policies will also remain unchanged. You can read our [full product lifecycle policies](#) on our support site.

1. Engine releases after 6.0.17 will increment as 7.0, 8.0, 9.0, and so on. This is to reflect that every release goes through the same quality testing and regression cycle.
2. In February for the 8.0 release, we will begin monthly releases of Continuous Data and Continuous Compliance engines.

Oracle Multi-tenant TDE for vCDBs

Updated in 7.0

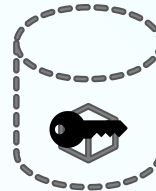

Security & Secrets Management

Oracle MT
TDE Encrypted
Database

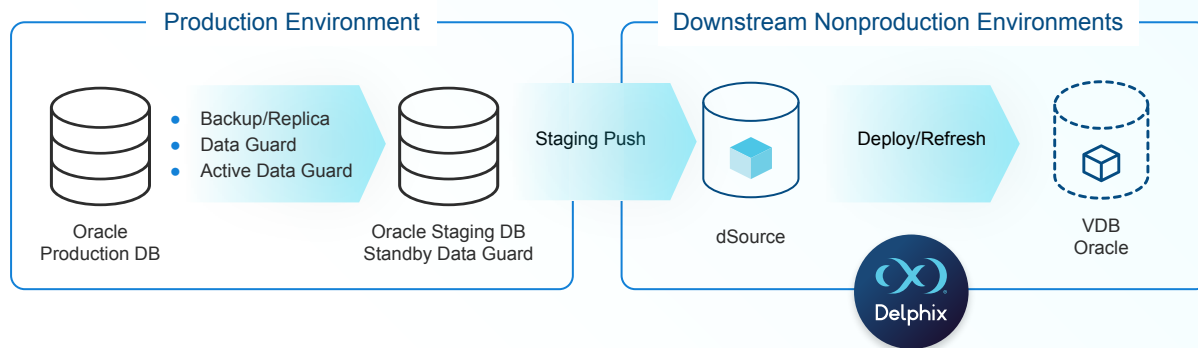

Deploy Transparent Data
Encrypted VCDB

New or Replicated
TDE Keys

- Use transparent data encryption (TDE) with virtual container databases to secure data-at-rest
- Use existing TDE keys or rekey data upon deployment
- Automated keystore sanitization ensures production TDE keys are not shared to non-production environments

Staging Push for Oracle

New in 7.0

- Push new data to the Delphix DevOps Data Platform instead of requesting data on a polling interval
- Isolate ingest to Delphix from production instances
- Ability to leverage 3rd party backup applications
- Fully tested integration with Oracle Data Guard and Active Data Guard allows for staging DB to be the standby DB, enabling tight point-in-time snapshots.

Cassandra and DataStax Enterprise Connector

New in 7.0

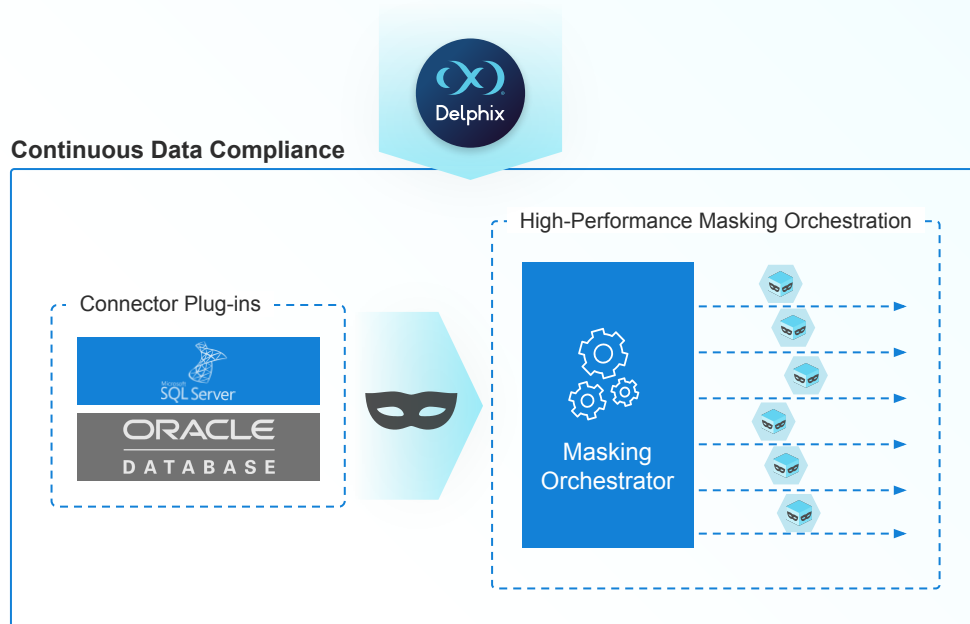

- Continuously sync to Cassandra and DataStax Enterprise databases and deploy data to nonproduction environments
- Deploy data from multiple Cassandra nodes as a single virtual database
- Track source changes along a continuous timeflow and redeploy data from any time
- Quickly deploy data to new ephemeral instances
- Branch production data, apply data masking, and deploy to new developer sandbox environments

Continuous Compliance

New & Updated for January 2023

- Hyperscale Compliance for Microsoft SQL Server
- JSON and XML: Tokenization/Re-Identification and Chained Algorithms

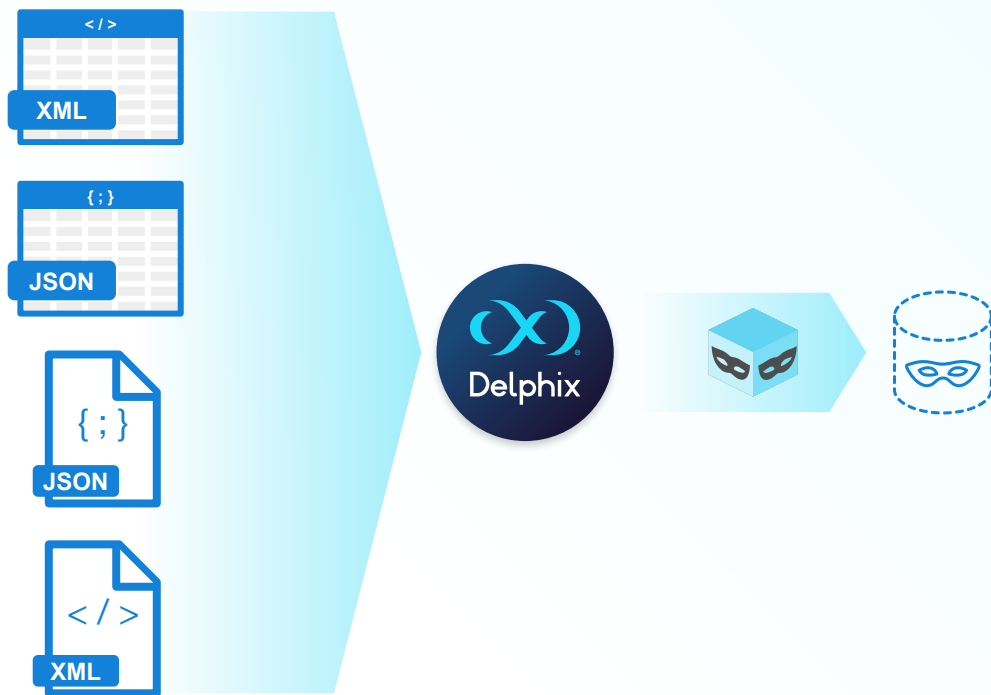

Hyperscale Compliance for MS SQL Server

Updates for 7.0

- Microsoft SQL Server connector available in January 2023
- Hyperscale Compliance leverages a flexible connector architecture decoupling unload/upload of data from masking operations
- High-performance data masking leveraging multiple engines for parallel processing
- Load balancing of masking engine instances assigned to Hyperscale to meet demand

JSON and XML Algorithms

Updates for 7.0

- Easily leverage tokenization/re-identification algorithms and chained algorithms with JSON and XML data
- Data tokenization/re-identification provides reversible data anonymization to protect data in nonproduction environments
- Chained algorithms enable complex multistep operations to be run on separate values such as Full Name algorithms

Data Control Tower

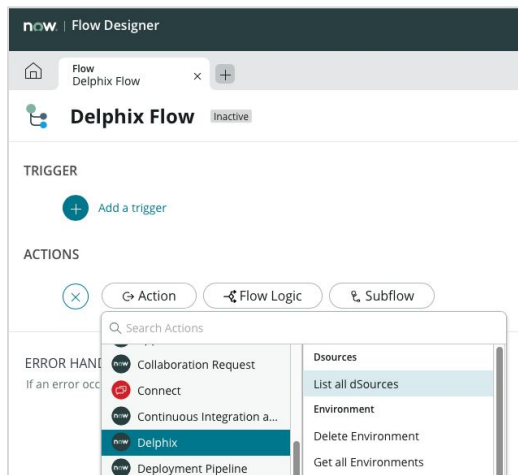

New & Updated for January 2023

- ServiceNow Integration V3 Updates
- Attribute Based Access Controls
- Global Data Provisioning Templates
- New Relic Integration

ServiceNow Integration Updates

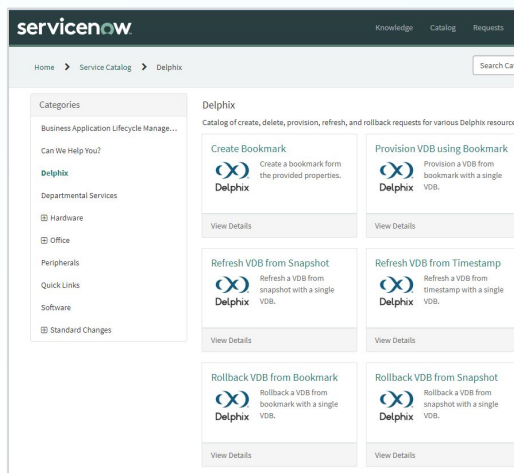

Additional Delphix Actions

- Create a Bookmark to preserve shareable VDB states
- New Refresh Data Table flows to keep ServiceNow in sync

DevOps TDM Service Catalog

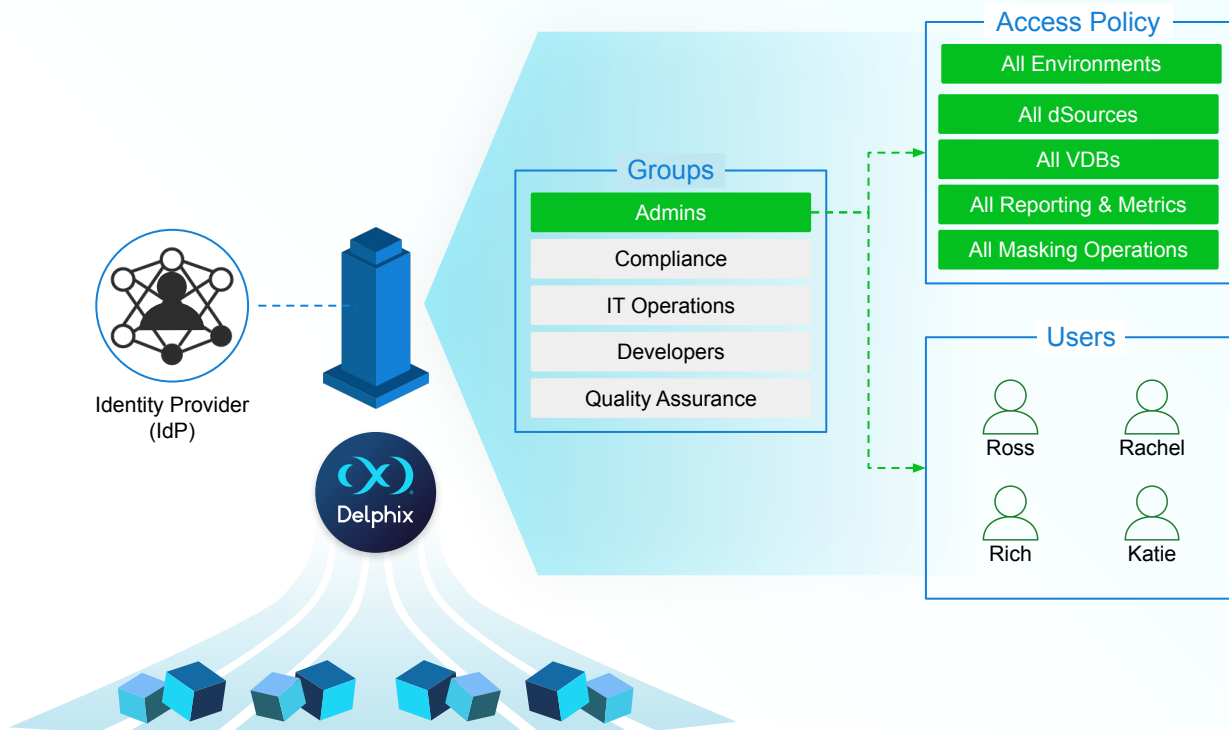

- Quickly leverage templates to deploy test data management sequences
- Easily distribute and deploy compliant data to non-production environments

ServiceNow V3

- Quickly integrate with enterprise toolchain to deploy ephemeral data with infrastructure
- Easily leverage predefined catalog data workflows in ServiceNow for data deployment
- Easily customize data workflows with 25+ Delphix actions and any other actions from integrations in the ServiceNow Store

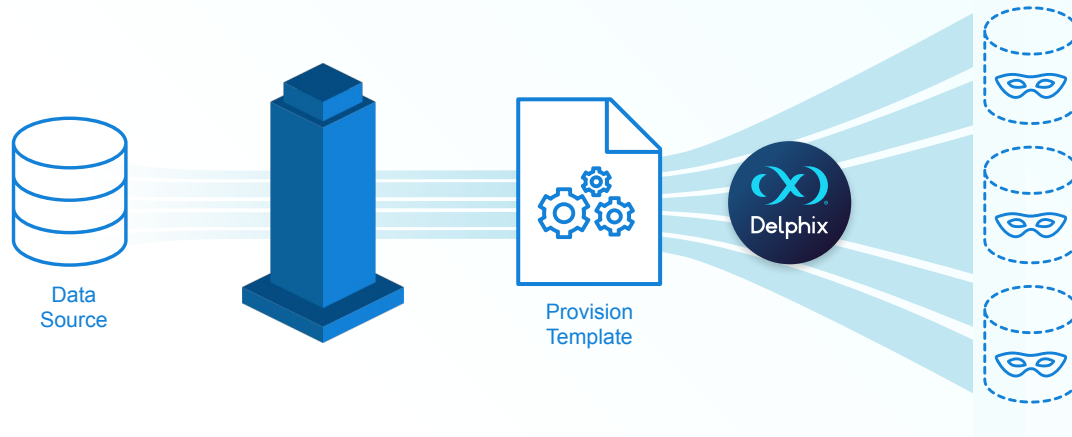

Attribute-Based Access Controls

Updated in DCT 4.0

- Fine tune security controls for data access with attributes
- Ensure Data Compliance with granular data access controls using groups, policies, and tags
- Integration with Identity Provider (IdP), Single Sign-On (SSO), and Active Directory (AD)
- Quickly define attribute-based access controls for data access across the enterprise

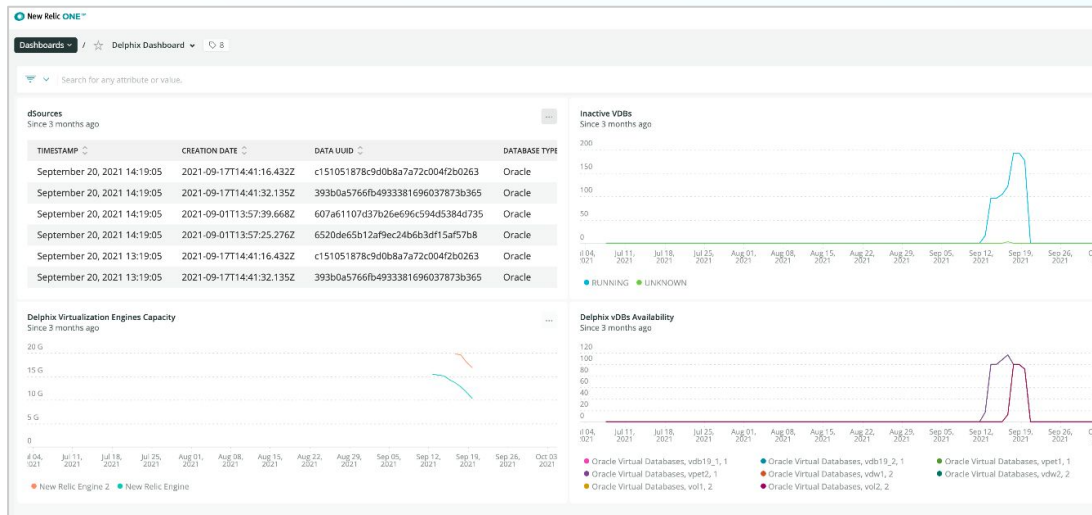

Global Data Provisioning Templates

New in DCT 4.0

- Configure once and deploy many times using deployment templates
- Customize data deployments with over 60 options to meet diverse enterprise requirements
- Development teams can instantly deploy data-ready environments without worrying about settings

New in January

- Integrate global Delphix events and metrics from DCT into New Relic monitoring dashboards
- Automate deployment of data-ready environments in multicloud enterprises for faster application troubleshooting
- Quickly redeploy historical data matched with applications and infrastructure from an incident for streamlined root cause analysis

Data Ready
Environment Deploy

new relic.

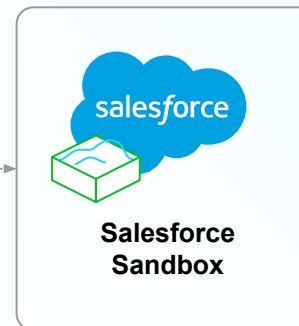

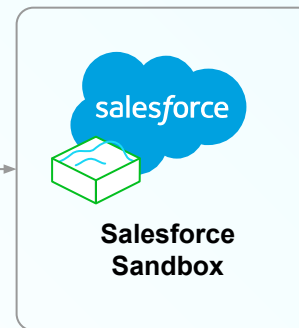

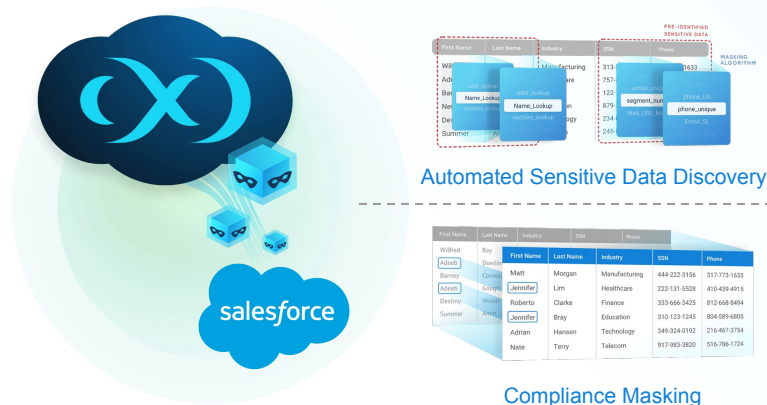

Multi-Cloud Applications

New & Updated in January 2023

- Delphix Compliance Services
- Microsoft Intelligent Data Platform Integration V1.1 (Azure Data Factory and Azure Synapse Updates)

Delphix Compliance Services

Salesforce Compliance

Updated in January

Sensitive Data Discovery and Masking

- 100+ pre-identified sensitive fields matched to masking algorithms
- Replaces PII with realistic but fictitious data
- Quickly meet compliance regulations such as GDPR, CCPA, and more

Unleash Salesforce data to multicloud applications

- Retain referential integrity across data sources with deterministic masking
- Maintain data shapes to ensure usability in testing

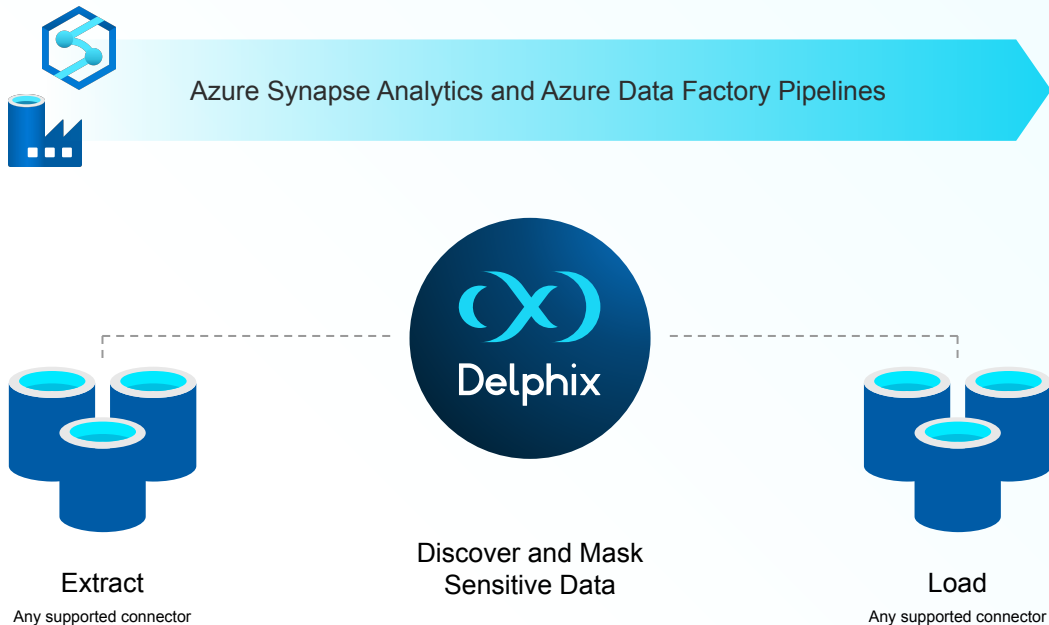

Compliance with speed and accuracy

- SaaS masking: A hassle free masking experience to meet your needs
- Compliance in days, not months

[Get started now with a free trial](#)

Microsoft Intelligent Data Platform

Updated in v1.1

- V1.1: Updated with automated creation of connectors, environments, mount points
- Accelerate data compliance using Microsoft Intelligent Data Platform's ETL tools with Delphix Continuous Compliance
- Quickly mask data while moving between 100+ Azure Synapse Analytics and Azure Data Factory connections
- Quickly identify sensitive data in ETL pipelines and mask using Delphix algorithms

Recent Updates

6.0.16

Released September 12, 2022

Continuous Data (Virtualization)

- Cloud Engines on Microsoft Azure
- Cloud Engines Cache Resize
- Continuous Vault Improved Security Controls
- Non-Admin User Password Reset
- Zero Trust Updates for SAP HANA
- Increased Mount Security
- iSCSI Parameter Warnings

Data Control Tower (DCT)

- ServiceNow Integration Hub Spoke
- Admin UI for Infrastructure with Tagging
- Admin UI for Storage Management

Multi-Cloud Applications

- OAuth 2.0 for SFDC Compliance Accelerator

6.0.17

Released November 15, 2022

Continuous Data (Virtualization)

- Source Sizing for Db2
- Environment Variables in Hooks

Continuous Compliance (Masking)

- JSON Field Masking
- XML Field Masking
- Containerized Masking
- Hyperscale Compliance Masking Job Sync

Data Control Tower (DCT) 2.2

- Service Now Integration 2.0
- Continuous Compliance APIs
- Global User Access Management
- Kubernetes & OpenShift templates

Multicloud Applications

- Continuous Compliance Services for CRM
- Salesforce Data Protect and Version 3.0

7.0

Released January 12, 2023

Continuous Data (Virtualization)

- Oracle: Multi-Tenant TDE for VCDBs
- Oracle: Staging Push
- Cassandra and DataStax Enterprise Connector

Continuous Compliance (Masking)

- Hyperscale Compliance: MS SQL Server
- JSON/XML: Tokenization/Re-Identification and Chained Algorithms

Data Control Tower (DCT) 3.0 & 4.0

- ServiceNow Integration V3 Updates
- Global Continuous Compliance UI
- Admin UI: Source Sizes
- Granular RBAC Policies
- Global Data Provisioning Templates
- New Relic Integration

Multicloud Applications

- Delphix Compliance Services Updates
- MS Intelligent Data Platform V1.1
