Delphix 5.3.4

<Presenter> | June, 2019

Delphix Dynamic Data Platform: 5.3.4 New Features

New Masking Endpoints

tokenizationJob

GET

/tokenization-jobs

POST

/tokenization-jobs

DELETE

/tokenization-jobs/{tokenizationJobId}

GET

/tokenization-jobs/{tokenizationJobId}

PUT

/tokenization-jobs/{tokenizationJobId}

- Addition of Tokenization Job Endpoints
- Addition of Re-identification Job Endpoints
- Addition of multipleProfilerCheck field to Profile Job endpoint
- Addition of isProfilerWritable field to file-field-metadata endpoint
- Addition of Database Ruleset PUT endpoint (refreshDropTables)

New HANA 2.0 Virtualization Plugin

**Ingestion without
Staging Node**

**Ingestion of Backups
from Source**

**Support for HANA
2.0 MDC**

**Tenant-level
Granularity &
Selectivity**

- Release of our new HANA Virtualization Plugin
- No support for HANA 1.0
- No support for Scale-out HANA
- Only support for Native HANA Backups and not BackInt based 3rd party backups

Challenge-Response Authentication (CRA) Enabled

Provides additional security
for support access to the the
Delphix engine

Delphix Engine registration
is required prior to support
login (no internet access is
required)

No user workflow impacted

Support For Masking AWS Aurora

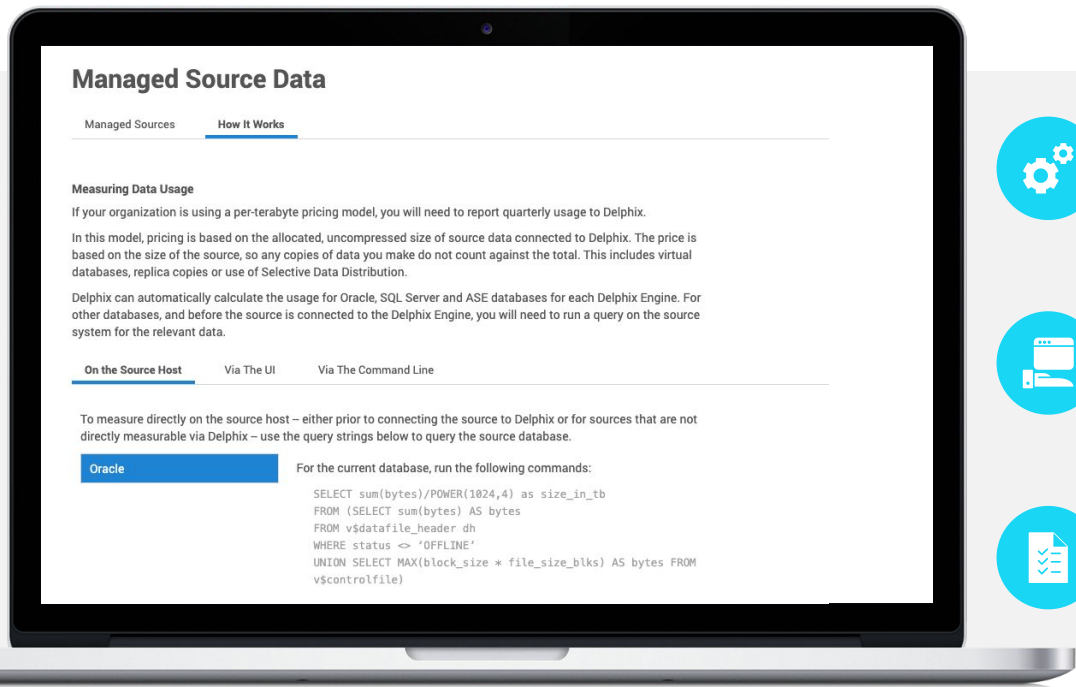

Support for masking AWS
Aurora PostgreSQL & MySQL

Amazon Aurora

Use the “PostgreSQL” &
“MySQL” connectors

Improvements to Usage Reporting

Building upon the 5.3.3 release

Introduces automatic measurement for Oracle, ASE and SQL Server (as in 5.3.3)

Guides to measure on source host for all data platforms in use

Certifications/Data Sources Update

Oracle

- Oracle 11.2, 12.1, 12.2 & 18c Virtualization on RedHat 7.6
- Oracle 12.2 Virtualization on Solaris x86 11.4
- SLES 12 SP4 Virtualization certification with Oracle 12.2
- SLES 12 SP4 Virtualization certification with Oracle 18c

ASE

- ASE 15.7 and 16 Virtualization on RHEL 7.6
- Support for dump history file
- SAP ASE Staging Server Pre and Post Hooks for Validated Sync

DB2

- Virtualization on RHEL 7.6

Postgres

- Postgres Virtualization on RHEL 7.6

EBS

- EBS Plugin version 1.5.0 introduces new features for improved Tool Control Language (TCL) error handling

ESX

- ESX 6.7 U1, U2
